

ELECTRICAL SYSTEMS OF CALIFORNIA

SUPERIOR SERVICE SINCE 1986

Don't get caught in violation of new Federal and State laws now in effect.

OSHA AND NFPA LIST CODES REQUIRING THE TESTING OF EXIT, PATHWAY LIGHTING EVERY 30 DAY AND FULL ANNUAL PERFORMANCE TEST.

EPA AND CALIFORNIA TITLE 22 DTSC NOW REQUIRES MERCURY LAMP RECYCLING, DISPOSAL TRACKING.

Local Fire Departments inspectors and fire investigation teams now site these violations in investigations. Managers protect yourself and your team members. January 2008 Sacramento County was hit with high winds resulting in major power outages. The county filed a record amount of building safety code violations following this storm.

Do not take a chance with such serious matters: avoid serious liabilities and fines by having, maintaining and testing adequate exit and emergency lighting systems in your building(s).

Electrical Systems of Ca. has a unique method of testing exit signs and emergency lighting systems — it is more affordable

than you think, and it is the law! OSHA (Sec.1910.36) requires a simple testing of emergency lights and emergency lighting every thirty days. Small investments in your Life Safety Code Requirements is frequently overlooked until and emergency occurs--and then its too late. Regular maintenance is required by NFPA Standard No. 101, chapter 31, section 1.3.7. "A functional test shall be conducted on every required emergency lighting system at 30-day intervals for a minimum of 30 seconds. An annual test shall be conducted for the 1½ hour duration. Equipment shall be fully operational for the duration of the test. Written records of visual inspections and tests shall be kept by the owner for inspection by the authority having jurisdiction."

Emergency lighting may prove to be a crucial factor in the safety of your employees and customers.

laws now in effect.**

ALL FLUORESCENT LAMPS AND TUBES MUST BE RECYCLED OR DISPOSED AS HAZARDOUS WASTE

EPA AND CALIFORNIA TITLE 22 DTSC NOW REQUIRES MERCURY LAMP RECYCLING, DISPOSAL TRACKING AND BROKEN LAMP CLEAN-UP KITS AND REPORTS. THIS CAN ONLY BE DONE BY A CERTIFIED UNIVERSAL WASTE HANDLES LIKE US.

All fluorescent lamps and tubes are considered hazardous waste in California when they are discarded because they contain mercury. (Title 22, division 4.5, chapter 11, section 66261.50) This includes: All Fluorescent lamps and High Intensity Discharge (HID) Lamps:

All fluorescent lamps and tubes must be recycled, or a universal waste handler (e.g., storage facility or broker), or an authorized recycling facility. (Title 22, division 4.5, chapter 23, section 66273.8) (The law requiring that fluorescent lamps be recycled, a universal waste handler, or an authorized recycling facility has been in effect since February 9, 2006.)
